216 Cross Platform Web Safe Colors

A few years ago, when most computers supported only 256 different colors, a list of 216 Web Safe Colors was suggested as a Web standard. The reason for this was that the Microsoft and Mac operating system used 40 different "reserved" fixed system colors (about 20 each). The 216 cross-platform web-safe color palette was created to ensure that all computers would display the colors correctly when running a 256 color palette:
